

**1. Annex D - Cover Letter.**

London, UK  
20 June 2025

To: *Jason Wilks*  
*1300 New York Avenue, N.W.*  
*Washington, D.C. 20577*

Dear Sirs:

We, the undersigned, offer to provide the consulting services for *Design and Implement Framework for Joint Investigative Teams for Financial Investigations and Asset Recovery (FIAR)* in accordance with your *Request for Proposal* dated *29 May 2025* and our Proposal. We are hereby submitting our Proposal, which includes both Technical and Price Proposals (in separate files). We have reviewed the proposed Standard Terms and Conditions of Agreement (Annex B) and do not have any comments to them.

We hereby declare that:

- That our organization is not an individual independent contractor holding itself out as a business.
- That our organization has more than one customer and that not more than 25% of its total revenue would generally be derived from IDB contracts.
- That our organization has the financial capacity to perform if awarded a contract by IDB, as defined herein.
- That our organization either has or can obtain insurance providing the coverage limits required by IDB, as required in **Annex B**, Standard Terms and Conditions of Agreement.

*GovRisk is a specialist international consultancy based in London that supports governments, regulators, and companies worldwide to strengthen governance and combat financial crime through research, training, and advisory services. Established in 2010, GovRisk has delivered high-impact programmes across more than 55 countries, focusing on areas such as financial crime prevention, anti-corruption, public financial management, and judicial reform.*

*GovRisk has no parent or holding companies, nor subsidiaries. We are not submitting this proposal as part of a consortium or joint venture.*

If our Proposal is accepted and the Contract is signed, we undertake to initiate the Services related to the assignment no later than the date indicated in Section 2.1.2 of the RFP.

We understand that the Bank is not bound to accept any Proposal that the Bank receives.

Authorized Signature: *VH*

|--------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| 1. What year was your firm/organization established?                           | 2010                                                                  |
| 2. In what province/state/country is your firm/organization established?       | United Kingdom                                                        |
| 3. Do you confirm that your firm/organization is from a Bank's member country? | Yes <input checked="" type="checkbox"/> / No <input type="checkbox"/> |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| 4. Has your firm/organization ever filed or petitioned for bankruptcy? (If YES, explain in detail the reasons why, filing date, and current status.)                                                                                                                                                                                                                                                                                                                                        | Yes ___ /No <input checked="" type="checkbox"/> |
| 5. Have you ever been terminated for non-performance on a contract? If YES, describe in detail in a separate Annex.                                                                                                                                                                                                                                                                                                                                                                         | Yes ___ /No <input checked="" type="checkbox"/> |
| 6. Has the CF, or to the best of your knowledge, controlling shareholder, senior manager or key employee of the CF ever been suspended or debarred by any government, a UN agency or other international organization, including the IDB Group, the World Bank Group, the African Development Bank Group, the Asian Development Bank or the European Bank for Reconstruction and Development? If YES, provide details, including date of reinstatement, if applicable, in a separate Annex. | Yes ___ /No <input checked="" type="checkbox"/> |
| 7. Has the CF including their respective officers, employees or agents, or to the best of your knowledge, sub-contractors, service providers or suppliers, engaged in any Prohibited Practices as defined by the Bank <sup>13</sup> in competing for this contract?                                                                                                                                                                                                                         | Yes ___ /No <input checked="" type="checkbox"/> |
| 8. Are you, or any of your sub-contractors, to the best of your knowledge, engaged in any activity that would put you or your sub-contractors, service providers or suppliers, if selected for this assignment, in a real or apparent conflict of interest with the Bank including the situations described in the IDB Corporate Procurement Policy?                                                                                                                                        | Yes ___ /No <input checked="" type="checkbox"/> |
| 9. Has the CF including their respective officers, employees or agents, or your sub-contractors, to the best of your knowledge, been associated or involved in any way, directly or indirectly, with the preparation of the Terms of Reference, and / or other documents used as part of this Request for Proposals?                                                                                                                                                                        | Yes ___ /No <input checked="" type="checkbox"/> |

<sup>13</sup> The IDB's provisions of Prohibited Practices and Sanctions Procedures are available at the website: [www.iadb.org/integrity](http://www.iadb.org/integrity).

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| 10. Relatives of active Bank staff or complementary workforce (jointly, "employees") within and including the fourth degree of consanguinity <sup>14</sup> and the second degree of affinity <sup>15</sup> are not eligible to directly work on Bank procurement contracts as a supplier, consultant, employee, or subcontractor. Do you confirm that the CF, its suppliers, consultants, employees, and its Sub contractors are eligible to work on Bank procurement contracts? | Yes <input checked="" type="checkbox"/> /No ___ |
| 11. Confirm that CF and your Sub-contractors understand IDB privileges and immunities, including immunity from taxes. By confirming you understand that these privileges and immunities do not apply to the CF or Subcontractors.                                                                                                                                                                                                                                                | Yes <input checked="" type="checkbox"/> /No ___ |
| 12. Confirm that the CF understands its own responsibility for paying any taxes related to income, personnel, etc.                                                                                                                                                                                                                                                                                                                                                               | Yes <input checked="" type="checkbox"/> /No ___ |
| 13. Confirm that the CF's price proposal is submitted in the specified currency.                                                                                                                                                                                                                                                                                                                                                                                                 | Yes <input checked="" type="checkbox"/> /No ___ |
| 14. Confirm that CF's Financial Statements for the most recent two (2) years are attached.                                                                                                                                                                                                                                                                                                                                                                                       | Yes <input checked="" type="checkbox"/> /No ___ |
| 15. Confirm that no more than 25% of the CF's revenue for each of the previous two fiscal years has been derived from IDB Contracts.                                                                                                                                                                                                                                                                                                                                             | Yes <input checked="" type="checkbox"/> /No ___ |

I, **Victoria Harvey**, certify that I am **Managing Director** of **International Governance and Risk Ltd ("GovRisk")**; that by signing this Proposal for and on behalf of **GovRisk** I am certifying that all information contained herein is accurate and truthful and that the signing of this Proposal is within the scope of my powers.

**Victoria Harvey, GovRisk Managing Director**

By signing this Proposal by and on behalf of **International Governance and Risk Ltd.**, I certify that all information contained in this document is accurate and truthful and that the signature of this Proposal is within the scope of my powers

16 June 2025

Victoria Harvey  
Managing Director

VH

### 3.1.4. Written statement representing the firm's overall financial viability<sup>2</sup>

Selection Process #: **RG-T4590-P003**

To Whom It May Concern,

**International Governance and Risk Ltd.** ("GovRisk") confirms its financial viability and capability to undertake and deliver the proposed project in accordance with the requirements outlined in the Terms of Reference.

GovRisk maintains sound accounting practices and sufficient resources to manage project activities and associated costs. We have a proven track record of successfully delivering projects of an equivalent size within budget and on schedule.

Our financial statements for the two latest fiscal years are attached following this statement and confirm our ability to meet the financial obligations of this project.

Should you require any additional documentation or clarification regarding our financial status, please do not hesitate to contact us.

Sincerely,

*VH*

Victoria Harvey, Managing Director  
GovRisk  
18 June 2025

---

<sup>2</sup> Financial statements attached at the end of the document

## 4. Firms qualifications and references.

### Section 3.2.1 Narrative description of the CF's organization, history, mission, structure, and number of staff

GovRisk is an internationally recognised provider of technical assistance, training, and advisory services in anti-corruption, financial investigations, asset recovery, public procurement, and governance reform. Founded in 2010, our mission is to promote economic reform, reduce illicit financial flows, and strengthen public sector integrity globally. Since inception, GovRisk has delivered over 100 high-impact programmes across 55 countries on six continents, including extensive work in the Caribbean region addressing transnational crime and financial investigations.

Headquartered in the United Kingdom with registered offices in Australia and Peru, GovRisk is led by a diverse and experienced team. The organisation is headed by a female Managing Director and includes a Head of Programmes, Programme Development Manager, two Project Managers, a Finance Manager, and a Head of Business Development. GovRisk's two founders serve as non-executive directors, providing delivery oversight and technical support. Of the nine core staff members, six are women and three are men, reflecting a strong commitment to gender diversity (67% female, 33% male). This core team is supported by a comprehensive faculty of over 400 technical experts, many of whom possess extensive experience working in the Caribbean region and bring specialist knowledge in anti-corruption, financial investigations, and governance reform.

Through adaptive local approaches and deep technical expertise, GovRisk has established a reputation for delivering practical, results-oriented interventions that drive institutional reform and capacity building worldwide.

### Section 3.2.2. Experience in the industry and with multilateral development institutions

GovRisk has over 15 years' experience in financial investigation and asset recovery, with a significant track record of collaboration with multilateral development institutions. We have delivered more than 20 major projects in this field for organisations such as the European Bank for Reconstruction and Development (EBRD), the UK Foreign, Commonwealth and Development Office (FCDO), USAID, the US Department of State, DANIDA, and GIZ. For example, over a five-year partnership with the EBRD in the Kyrgyz Republic, GovRisk supported public procurement reform to enhance transparency, reduce corruption, and strengthen SME participation through digitalisation.

We also work closely with intergovernmental organisations and global standard-setting bodies on many of its projects, leveraging relevant coordination mechanisms and international standards frameworks to drive measurable improvement of laws, regulations and enforcement practices in beneficiary countries. We have supported over 15 countries in conducting National Risk Assessments (NRAs), preparing for United Nations Convention Against Corruption (UNCAC) reviews, OECD Anti-Bribery Convention accession, and Financial Action Task Force (FATF) Mutual Evaluation Reports (MERs). Notably, from 2022 to 2025, we supported Mauritius in its preparations for accession to the OECD's Working Group on Bribery, providing a comprehensive gap analysis and direct support for the country's peer review and plenary presentations.

Our work in financial investigation and asset recovery has focused on legislative review, standard operating procedures, and multi-agency case management. We developed the International Best Practices Guide for Joint Operations between Financial Intelligence Units (FIUs), published in 2024, which has strengthened cross-border investigations and cooperation among FIUs in Colombia, Ecuador, Panama, and Peru. In Central America, we enhanced joint investigations for money laundering in Guatemala, Honduras, and El Salvador by building the capacity of prosecutors and FIUs to coordinate complex cross-border cases. Over eight years in Myanmar, we developed the Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT) regime in line with the FATF Standards, including an analyst exchange with Indonesia's FIU to improve analytical techniques. In the Western Balkans, we delivered cross-border asset recovery training for prosecutors, judges, and police from Kosovo, Montenegro, and North Macedonia, fostering regional collaboration. In Mexico, we strengthened state-level anti-money laundering and asset recovery capabilities, improving coordination between investigative and prosecutorial authorities. Since 2021, we have increased institutional capacity in Argentina, Brazil, and Paraguay to regulate, supervise, identify, report, investigate, and prosecute money laundering and terrorist financing, with a particular focus on strengthening financial investigation capabilities. This programme has also supported enhanced regional collaboration and the implementation of targeted financial sanctions.

Our proven record has led to repeat engagements with major donors and multilateral institutions, and our programmes have resulted in enhanced national compliance with international standards, improved investigative capacity, and tangible asset recovery outcomes. This breadth and depth of experience clearly demonstrate GovRisk's capability and reliability in delivering financial investigation and asset recovery programmes in partnership with multilateral development institutions.

**Section 3.2.3. Experience with Similar Services**

Over the past 15 years, GovRisk has supported FIUs, special anti-corruption prosecutors, and cross-border task forces to enhance their investigative capabilities and coordination mechanisms. We have done this by delivering high-quality technical assistance and capacity-building in financial investigations, asset recovery, and anti-corruption reform. Most recently, we have begun to expand our work on emerging threats, including cryptocurrency-related investigations. These interventions reflect GovRisk's ability to respond to the evolving needs of anti-corruption and law enforcement bodies across the region and align with regional legal frameworks. The table below provides an excerpt of our relevant work.

| Topic                                      | Project Title                                                                  | Summary                                                                                                                                                                      | Dates                  | Source of Funding            |
|--------------------------------------------|--------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|------------------------------|
| Financial Investigation and Asset Recovery | Strengthening State AML Investigative and Intelligence Units in Mexico (PECEL) | Delivered diagnostics and tailored capacity-building to strengthen financial investigations and AML coordination across eight Mexican states.                                | Apr 2024 to March 2026 | US Department of State (INL) |
| Financial Investigation and Asset Recovery | OECD Bribery Accession in Mauritius                                            | Conducted mock evaluation and institutional review to support Mauritius' accession to the OECD Working Group on Bribery.                                                     | 2022 to 2025           | UK FCDO                      |
| Financial Investigation and Asset Recovery | AML/CFT Programming in Argentina, Brazil & Paraguay (TBA)                      | Strengthened AML/CFT enforcement and cooperation across public and private institutions in the Tri-border Area, including targeted technical assistance and action planning. | 2021 to 2025           | US Department of State (INL) |
| Financial Investigation and Asset Recovery | Regional Caribbean Financial Crime Forum                                       | Delivered capacity building for 16 jurisdictions to prepare for FATF evaluations and enhance financial crime prevention.                                                     | 2016 to 2017           | UK FCDO                      |
| Financial Investigation and Asset Recovery | Support to Guyana's State Asset Recovery Agency                                | Provided strategic advisory and SOP development for Guyana's newly established asset recovery agency.                                                                        | 2018 to 2019           | US Department of State (INL) |
| Financial Investigation and Asset Recovery | AML Advisory and FIU Support in Myanmar                                        | Supported Myanmar's AML/CFT regime and FIU development through legislative reform, training, and Mutual Evaluation preparation.                                              | 2014 to 2018           | UK FCDO                      |
| Joint Investigation Team Frameworks        | Design of Joint Investigation Units in Guatemala, Honduras, El Salvador        | Developed joint AML investigation frameworks, MoUs, and action protocols for Northern Triangle countries (frameworks and training delivered in all 3 countries).             | 2017 to 2018           | UK FCDO                      |
| Joint Investigation Team Frameworks        | Justice System Reform in Brazil                                                | Designed an investigation unit model for Brazil's PGR, based on UK JIT practices, and delivered training on asset freezing and team-based investigations.                    | 2016 to 2017           | UK FCDO                      |
| Joint Investigation Team Frameworks        | Asset Recovery and SOC Training in Western Balkans (WBROLI)                    | Delivered cross-border mentoring and simulation exercises on coordination of law enforcement and special prosecutors in Montenegro.                                          | 2022 to 2025           | UK FCDO                      |
| Joint Investigation Team Frameworks        | Asset Recovery and SOC Training in Western Balkans (WBROLI)                    | Delivered cross-border mentoring and simulation exercises on coordination of law enforcement and special prosecutors in Kosovo.                                              | 2022 to 2025           | UK FCDO                      |
| Joint Investigation Team Frameworks        | Asset Recovery and SOC Training in Western Balkans (WBROLI)                    | Delivered cross-border mentoring and simulation exercises on coordination of law enforcement and special prosecutors in North Macedonia.                                     | 2022 to 2025           | UK FCDO                      |
| Joint Investigation Team Frameworks        | Modernising China's Anti-Money Laundering System                               | Provided strategic advice on the implementation of taskforces and JITs as a means to improve against FATF IO6, 7, 8.                                                         | 2017 to 2022           | UK FCDO                      |
| Digital Assets and Cryptocurrency          | Digital Assets and Cryptocurrency Training in Mexico and Regional              | Delivered cryptocurrency investigation training to prosecutors and analysts in Mexico and across Latin America.                                                              | 2022 to 2023           | US Department of State (INL) |
| Digital Assets and Cryptocurrency          | AML/CFT Programme in Argentina, Brazil & Paraguay (TBA)                        | Delivered Virtual Asset Service Provider (VASP) supervision standards training                                                                                               | 2021 to 2025           | US Department of State (INL) |

|                                   |                                                 |                                                                                                                                               |              |         |
|-----------------------------------|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------|---------|
| Digital Assets and Cryptocurrency | Training organised under WBROLI                 | Delivered practical training to law enforcement in Montenegro on tracing and seizing cryptocurrencies and virtual assets.                     | 2022 to 2025 | UK FCDO |
| Digital Assets and Cryptocurrency | Training organised under WBROLI                 | Delivered practical training to law enforcement in Kosovo on tracing and seizing cryptocurrencies and virtual assets.                         | 2022 to 2025 | UK FCDO |
| Digital Assets and Cryptocurrency | Western Balkans Rule of Law Initiative (WBROLI) | Delivered multiple trainings to law enforcement in Bosnia and Herzegovina on virtual assets and their use in money laundering investigations. | 2022 to 2025 | UK FCDO |

| Supporting Effective Joint Investigations for Money Laundering by Competent Authorities in Guatemala, Honduras and El Salvador, UK Foreign, Commonwealth and Development Office (FCDO) | <p>To strengthen cross-border financial crime investigations in Guatemala, Honduras, and El Salvador and prevent illicit funds from entering their financial systems, this <b>program supported the integration of UK and international best practices into the legal and operational design of Joint Investigation Teams (JITs)</b>. GovRisk led technical consultations, strategy workshops, and training with Public Prosecutor's Offices and FIUs, <b>building understanding and consensus around the frameworks and processes needed to establish JITs</b>. The program also fostered political will and informal networks to advance this agenda across the three jurisdictions. Consultations and strategic sessions achieved six key outcomes:</p> <ul style="list-style-type: none"> <li>• Clarified resource requirements (human, financial, technological) for JITs;</li> <li>• Improved legal frameworks, including asset-sharing agreements;</li> <li>• Established a trilateral agreement outlining JIT-specific principles, procedures, and action protocols;</li> <li>• Enhanced efficiency of Mutual Legal Assistance and information exchange;</li> <li>• Expanded use of special investigative techniques within JITs;</li> <li>• Strengthened prosecutorial and judicial capacity to handle complex transnational crime cases involving JITs.</li> </ul> | Marijose Vilá<br>Prosperity and Projects Officer<br>British Embassy<br>Guatemala - Honduras<br>Marijose.Vila@fco.gov.uk<br>Office: +1 (502) 2380-7300            |
| Western Balkans Rule of Law Initiative, Chemonics UK (funded by UK FCDO)                                                                                                               | <p>As a partner to Chemonics UK in the UK Foreign, Commonwealth and Development Office (FCDO)-funded Western Balkans Rule of Law Initiative, GovRisk delivered advanced <b>training to Police Departments and Special Prosecutors in financial investigations and asset tracing, seizure, and confiscation with the aim of combating serious organized crime (SOC) in the region</b>. Led by our highly specialised experts, including our proposed Project Lead, Mark Heffer, GovRisk conducted a series of workshops for competent beneficiaries across Bosnia and Herzegovina, Kosovo, Montenegro, and North Macedonia. These sessions significantly <b>strengthened the operational capacity of financial investigation teams, with modules focused on cross-border investigations, mutual legal assistance, and effective information sharing</b>. Through these multi-jurisdictional workshops, GovRisk also built the capacity of financial investigators and Special Prosecutors to <b>track, trace, and recover cryptocurrencies and other virtual assets</b>, equipping law enforcement agencies and Prosecutor's Offices with the skills and knowledge needed to address the evolving challenges of financial crime, including those posed by digital currencies and organized crime groups (OCGs).</p>                                                           | Max Rebuck<br>Senior Manager,<br>Chemonics UK<br>mrebuck@chemonics.com<br>Office: +44 02070393430                                                                |
| Caribbean Anti-Corruption and Financial Crime Prevention Regional Initiative, UK FCDO                                                                                                  | <p>The Anti-Corruption and Financial Crime Prevention Regional Initiative in Trinidad &amp; Tobago, supported by the UK FCDO, convened a <b>high-level workshop in Port of Spain to strengthen regional cooperation following the 2016 London Anti-Corruption Summit</b>. The event focused on key topics such as <b>asset restraint and recovery, beneficial ownership registers and information exchange, National Risk Assessments, and enhanced inter-agency collaboration between anti-corruption and AML/CFT authorities</b>. In addition to expert-led sessions to help Caribbean jurisdictions prepare for FATF Mutual Evaluations, the initiative included a benchmarking exercise for Integrity Commissions and Anti-Corruption Agencies, providing each with a <b>tailored assessment of their capacities against international standards</b> and practical recommendations for improvement, with results presented at the Commonwealth Caribbean Heads of Integrity Commissions and Anti-Corruption Bodies meeting.</p>                                                                                                                                                                                                                                                                                                                                          | Beatrice Rose<br>Head<br>Economic and Political<br>Section<br>British High Commission,<br>Port of Spain<br>Beatrice.Rose@fco.gov.uk<br>Office: +1 (868) 350-0444 |

### Section 3.2.5. Distinguishing Abilities: discuss what it considers to be its distinguishing abilities to successfully provide these services.

GovRisk and the assembled team of experts bring a combination of in-depth multi-jurisdictional experience, knowledge of international standards, and innovative training methods that position us strongly to deliver these services not only successfully but exceptionally.

- **Extensive Regional and Multi-Jurisdictional Experience:** The team has deep experience working in the Caribbean region as well as across a broad range of legal systems globally. This enables us to tailor our approach to each jurisdiction's specific legal frameworks, institutional realities, operational priorities, and prevalent crime types—ensuring contextual relevance and immediate applicability.
- **Operational Insight and Practical Training Approach:** Drawing on hands-on experience addressing the practical challenges faced by investigators and prosecutors in securing convictions and recovering assets, we design highly interactive, scenario-based training that mirror real operational pressures. These include:
  - Decision-making exercises under operational pressures;
  - Team-based scenarios with time constraints;
  - Fully documented exercises with measurable outputs;
  - Inclusion of participants' real-world case studies;
  - Structured plenary feedback and collective problem-solving.
- **Cross-Sector Compliance Expertise:** Our experience spans both public and private sectors, with a clear understanding of data protection, client confidentiality, and AML/CFT compliance obligations.
- **Interagency Coordination Focus:** Our approach routinely involves all key law enforcement and regulatory agencies, fostering cooperation and building strong foundations for JITs, including police, intelligence, FIUs, customs, tax, prosecutors, and anti-corruption bodies.
- **Integrating International Cooperation and FATF Standards:** We ensure that overseas intelligence sources and Mutual Legal Assistance (MLA) mechanisms are actively incorporated into our asset tracing and evidence-gathering processes—an often neglected but essential aspect of effective investigations. Our approach is fully aligned with the FATF standards, directly mapping our work to the FATF 40 Recommendations, 11 Immediate Outcomes, and jurisdiction-specific evaluation priorities.

## 5. Supplier Diversity.

### Section 3.3.1. Supplier Diversity

**Is your firm a Woman-Owned Business? No.** GovRisk is not formally registered as a woman-owned business. However, women hold leadership positions within the company, including a female Managing Director and member of the board, and the overall gender ratio across staff and consultants is approximately 70% women. GovRisk also has an established Diversity & Inclusion corporate policy that applies to both permanent staff and consultants, which is regularly reviewed and updated.

**Is your firm an Afro-descendants/Indigenous-Owned Business? No.**

**Is your firm a Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ)-Owned Business? No.**

**Is your firm a Disability-Owned Business? No.**

## 6. Sustainability.

### Section 3.4.1. Does your firm use low-embedded emission products, reusable products, and products (including those used in services) that contain the maximum level of post-consumer waste, post-industrial, and/or recyclable content, without significantly affecting the intended use of the goods or services?

**Yes.** GovRisk is committed to environmentally conscious procurement and operational practices. Where practical, we prioritise the use of products with low embedded emissions—meaning products that have been manufactured, transported, and processed in ways that minimise greenhouse gas emissions across their lifecycle. This includes selecting goods with high recycled or recyclable content, and favouring reusable products to reduce overall environmental impact. We also actively limit the purchase of single-use plastics, reduce unnecessary printing by prioritising electronic documentation, and maintain diligent recycling practices. These commitments are outlined in GovRisk's Environmental Policy, which applies both to our office operations and project delivery. All such measures are implemented without compromising the intended use or quality of the goods and services we provide.

### Section 3.4.2. Does your firm attempt to identify and source energy from the least emission-intensive energy sources? This includes minimizing onsite fossil fuel usage for heat or production, sourcing electricity from renewable energy providers where available and economically viable, and replacing onsite fossil fuel consumption with renewable electricity.

**Yes.** GovRisk is committed to environmentally responsible practices in line with its Environmental Policy. As an independent consultancy operating from a co-working space, GovRisk does not have direct control over the selection of energy suppliers, the sourcing of electricity, or the management of heating systems within its office

environment. Despite these constraints, GovRisk actively promotes energy efficiency among its staff by encouraging the use of energy-efficient equipment, switching off devices when not in use, and adopting water and heating conservation measures within its operational remit. Should circumstances allow greater influence over energy sourcing in the future, GovRisk would seek to prioritise renewable and low-emission energy options to further reduce its environmental impact.

**Section 3.4.3. Does your firm consider the development of a comprehensive carbon emissions inventory, including estimation and reporting of Scope 1, 2, and 3 carbon emissions? Additionally, does your Firm estimate emissions attributable to services and products**

As a consultancy firm, GovRisk recognises that its most significant emissions are likely Scope 3, primarily from international and business travel, office operations, and outsourced services. While a formal inventory is not currently in place, the company actively mitigates environmental impact by prioritising remote work wherever feasible, without compromising project quality.

GovRisk understands the value of a carbon emissions inventory in managing environmental impact and will continue to review its environmental practices. The development of a formal carbon inventory, including emissions attributable to its services and products, may be considered as part of its evolving sustainability programme.

**Section 3.4.4. Has your firm considered developing a comprehensive carbon emissions reduction target and plan that is compatible with the overall climate change mitigation objectives of the Paris Agreement? If so, could you inform the Bank of the plan and the action items pertaining to the Work?**

GovRisk's Environmental Policy is guided by the UN Global Compact and the UN Sustainable Development Goals, particularly Responsible Consumption and Production (SDG 12). Although a formal carbon reduction target or Paris Agreement-aligned plan has not yet been adopted, GovRisk is committed to continuously monitoring its environmental impact and regularly reviewing internal policies. As part of this ongoing commitment to sustainability, GovRisk is open to adopting a carbon reduction target and plan aligned with the Paris Agreement. This process would begin with assessing the carbon footprint, identifying major emission sources, setting measurable reduction goals, and engaging stakeholders in line with best international practices.

## **7. Annex G – Proposed Methodology**

### **1. Context for this work and understanding of requirements**

This project represents a strategic investment in regional capacity and institutional readiness to tackle financial crime for the Caribbean. Responding to the pressing need for coordinated cross-border approaches in the increasingly complex financial crime landscape, the project complements the work of the ARIN-CARIB network by translating its goals into operational enforcement mechanisms.

In a region where financial crime networks typically operate transnationally, yet law enforcement responses remain unevenly coordinated - this Project is highly relevant. It supports the Citizen Security Division's wider regional objectives of improving the capacity of Caribbean governments to address citizen security and justice challenges. For example, by enhancing operational capabilities and effectively disrupting criminal networks, public trust is strengthened. At the same time, the harmonization of standard operating procedures supports fair and lawful practices - thereby promoting transparency, due process and equal access to justice.

In recent years, Joint Investigation Teams (JITs) have become a vital tool in countering illicit finance, helping countries improve their capacity to secure convictions and confiscate assets in line with the FATF Standards. All Caribbean jurisdictions made significant improvements in Technical Compliance (TC) (i.e the overall Anti-Money Laundering framework) during the 4th round of FATF assessments and the pressure of the 5th round assessments (and those jurisdictions who have been on the "grey-list") is driving a desire to pursue JITs as a means to demonstrate Effectiveness, particularly in Immediate Outcomes 2, 7 and 8. The significant enthusiasm at the political and agency level must now be paired with the tools to overcome a range of barriers and achieve the sustained, institutional change necessary for functioning, effective JITs.

This project must inherently be adaptive and solution oriented, capable of responding to operational realities and jurisdiction nuances (see "Proposed Approach"). It must also empower its beneficiaries to be similarly adaptive, to overcome future barriers to establishing effective JITs (which may be political, institutional etc.) which will arise after this project is concluded.

The project must deliver three essential outcomes to be considered successful.

**First**, it must establish comprehensive legal and operational frameworks for the creation of JITs, ensuring that these frameworks are well-tailored to the varied needs of Caribbean jurisdictions, rather than simply importing an approach which is considered "best practice" in another context.

**Second**, the project must drive an immediate and tangible change in operational capabilities within those jurisdictions supported during the project's pilot phase, enabling them to implement and benefit from the new JIT frameworks throughout the project life cycle.

**Third**, the project must build the long-term capability for these frameworks to be adopted and employed across all Caribbean jurisdictions. This requires two elements: the Phase 1 training (see "Operational Methodology") must instill understanding of the core principles and operational procedures among key justice sector actors. Then, the approach to Phase 4 (see "Operational Methodology") must ensure that agencies can apply the frameworks effectively across jurisdictions with diverse risk profiles, legal frameworks, procedures, investigative powers, evidence standards, and institutional capabilities.

## 2. Proposed Approach

This project requires a phased, participatory and systems-oriented approach, guided by 3 principles:

### 2.1 Co-creation with stakeholders to provide sustainable, locally-owned solutions

**Why?** This project must overcome legal and institutional barriers across multiple jurisdictions, to unlock their capabilities to form and use JITs. In our experience, it is necessary to spend additional time to allow stakeholders to co-create these frameworks, if their use is to become the new, sustained routine (rather than, say, a taskforce established in response to a few immediate, specific cases).

**How?** We will take an inclusive and transparent approach to stakeholder engagement and actively integrate key agency representatives into the development process for the proposed JITs framework. A comprehensive needs assessment will be complemented with training and consultations which aim not only to present relevant best practice and model legislation, but also to provide a forum for discussion, constructive debate and consensus-building around the needs and challenges that the framework should address. This collaborative approach will ensure that key stakeholders are invested in the resulting project outputs and committed to sustaining their implementation well beyond the project lifecycle.

**GovRisk experience building trust with Caribbean law enforcement agencies, even in short, virtual engagements:** Since our first project in 2010 (a regional Caribbean financial crime prevention forum in Port of Spain), we have built trusted relationships with the region's intelligence, investigations, prosecutions and asset recovery agencies and supported countries' preparation for CFATF assessments. We often have to deliver value within strict time and resource constraints. For example, in 2016 we designed and delivered a regional project component which, in partnership with a previous UNODC project in Commonwealth Africa, benchmarked the policies and operational procedures of 56 anti-corruption agencies and integrity commissions in Africa and the Caribbean. Our part of the project, on a 6 month timescale, worked in depth with 16 participating jurisdictions remotely and provided training materials to all Caribbean jurisdictions. Project Lead Mark Heffer is currently conducting a training needs analysis of all law enforcement agencies in Jamaica with a view to enhancing intra- and inter-agency cooperation and reforming investigative working protocols related to financial crime investigation, intelligence sharing, asset recovery, and mutual legal assistance.

### 2.2 Developing detailed knowledge of institutional capacity and political economy factors from the early training delivery phase

**Why?** The principle challenges standing in the way of these jurisdictions adopting JIT frameworks are varied: legal, political and institutional (resources, power, influence and capabilities) and the success of the later stages of the programme depends on a thorough understanding of these underlying drivers.

**How?** We will take an iterative approach to the project deliverables, applying learning from delivery of each phase to the design of the next in order to ensure that the final outputs are routed in real operational needs and address identified pain-points. The training phase in particular serves as a mechanism for diagnostic insight, helping to surface operational realities and inform a more context-appropriate JIT framework. We will use it to develop our institutional knowledge of the key agencies, identifying not only capacity and procedural gaps but also key political economy factors that will influence the ultimate design and operational viability of the proposed JITs framework.

### GovRisk experience developing political economy and institutional capacity knowledge through project delivery

GovRisk has delivered 300+ financial crime-related training sessions worldwide and supported 30+ countries to improve their legal and operational frameworks. Through this work, it has been essential to build understanding of the needs and motivations of different actors in the system, for example when designing a Beneficial Ownership Roadmap for China, developing the capacity of the FIU in Myanmar, or when supporting Brazil to adopt new legal standards for bribery and corruption. In each case, a closely-coordinated team of experts mapped out technical capabilities, power and influence factors etc. and equipped beneficiaries to affect long-term policy changes.

## 2.3 Leveraging existing mechanisms and commitments to sustain buy-in for reform

**What?** Our interventions will be strategically designed and communicated to align with, reinforce and build upon established regional cooperation networks and international standards, capitalising on existing momentum and political will to drive short-term action and enable long-term sustainability.

### How?

- **Alignment with FATF Standards:** All jurisdictions in scope for the project are committed at the highest levels to achieving compliance with the FATF standards for AML/CFT. This includes specific obligations to address deficiencies in the effective investigation and recovery of criminal proceeds. GovRisk has extensive experience delivering capacity-building and advisory support aligned with FATF recommendations, helping jurisdictions demonstrate measurable progress in their ongoing reporting to CFATF.
- **Leveraging Regional Security System (RSS) Technical Resources:** We will conduct a comprehensive review of existing technical resources developed by the Regional Security System (RSS), including draft policies, procedures, and training materials. Rather than duplicating previous efforts, we will adapt and enhance these resources to ensure they reflect current best practices and are tailored to the operational realities of participating agencies.
- **Strengthening ARIN-CARIB Cooperation:** We will coordinate closely with ARIN-CARIB (both the Secretariat and peer members), who we anticipate will play a critical role in the long-term uptake and operationalisation of JITs, particularly in jurisdictions outside the initial pilot group. Our frameworks and procedures will be designed to ensure full interoperability with ARIN-CARIB's existing mechanisms for information sharing and mutual assistance.

Throughout the project, we will maintain close engagement with regional leaders and technical stakeholders to ensure that interventions remain aligned with existing commitments and priorities. This builds on our strong relationships with many key agencies at multiple levels of seniority. By clearly demonstrating how our activities support the region's obligations under frameworks such as FATF, ARIN-CARIB, and RSS, we will help secure sustained high-level buy-in and maximise the long-term impact of the project. Our approach situates each intervention within a broader, integrated strategy to strengthen the region's capacity to disrupt illicit financial flows and recover criminal proceeds, ensuring that project outcomes are both meaningful and durable.

**GovRisk experience working in line with national mechanisms and commitments:** The existing political buy-in to the (C)FATF follow-up process is a proven driver of legal and institutional reforms which has been a critical element of success and measurement of results on more than 40 GovRisk projects. Being sensitive to stakeholders' FATF-driven incentives can ensure that our interventions align with long-term stakeholder-owned actions to bring the country in line with international standards.

## 3. Operational Methodology

Based on this overall approach, we propose to deliver the requirements of the Terms of Reference via the following 4-phase methodology:

Figure 1: 4 Project Phases

### 3.1 Phase 1: Project inception and needs assessment (~3 months)

Phase 1<sup>3</sup> will be used to mobilise the project team, complete desk research (RSS resources and other materials), refine the scope, establish buy-in and consensus on the key project objectives with all key stakeholders, conduct a comprehensive needs assessment of existing agency capacity (including a 1-week in-country visit), and prepare an Inception Report detailing Phase 1 findings and a detailed training plan for delivery in Phase 2.

#### 3.1.1 Team mobilisation and stakeholder engagement

Led by the Project Lead (Mark Heffer) and Senior Project Manager (Polly Calvert) (see “Team Structure and Composition”), the project team will be mobilised and briefed on the key technical and operational aspects of the project activities. Internal meetings will be held to establish internal governance mechanisms, refine roles and responsibilities for each project phase, set quality assurance and communication protocols, and define escalation procedures. In Week 1 (see weekly breakdown in “Work Plan / Delivery Schedule”), we will hold a project kick-off meeting with the IDB and RSS team representatives to refine and agree the project workplan and delivery timeline, review expectations for the needs assessment (including jurisdictions in scope and dates for the in-country visit) and Inception Report to be produced by the end of Phase 1, take receipt of key RSS resources and materials previously produced, and establish a bi-weekly virtual check-in schedule.

In agreement with IDB and RSS, we will then commence outreach to key stakeholders in each of the selected jurisdictions in order to present the project scope and objectives, outline the proposed scope of their agency’s participation and request virtual meetings to secure buy-in and align expectations.

In conjunction with these initial stakeholder meetings, our team will conduct a desk-based review of key jurisdictional laws and regulations, the existing RSS resources and materials, and develop self-assessment questionnaires for dissemination to the participating agencies. These questionnaires will look to gather insights into: i) existing institutional frameworks, procedures and practices; ii) knowledge and capacity of key institutional staff as relevant to financial investigations and asset recovery; iii) priorities, gaps and needs in terms of skills, knowledge, resourcing constraints, procedural infrastructure etc.; and iv) current experience of and openness to inter-agency and cross-border cooperation in the context of financial crime prevention. These questionnaires will be disseminated to key stakeholders along with requests for copies of their current standard operating procedures (SOPs), memorandums of understanding (MoUs) with other agencies, institutional growth and training plans, and other relevant documents.

The team will review the completed questionnaires and stakeholder materials, and use the combined findings of the desk-based review to finalise the agenda and preparations for the in-country needs assessment visit.

**Note on jurisdiction selection:** GovRisk will agree the principles and priorities for jurisdiction selection for the project activities with IDB and RSS at project inception, then review the choices together. It is envisaged that the earlier needs assessment and training phases will seek to engage the widest number of jurisdictions possible from within the ARIN-CARIB membership. Consideration of the smaller selection of jurisdictions to form the pilot implementation group (Phase 4 of the project) will commence early, to align on the associated expectations and make preparations as early as possible. Key criteria that will be considered in jurisdiction selection may include:

- Balancing a mix of legal systems and operational environments, whilst ensuring jurisdictions systems are mature enough to implement rapidly
- Level of “active” membership of ARIN-CARIB (and willingness to provide peer-advice to other jurisdictions)
- Recognised expertise of key national agencies in asset recovery and financial crime investigations
- Proximity of jurisdiction’s next CFATF review (Trinidad & Tobago, Bahamas, Bermuda, Cuba and Jamaica<sup>4</sup> are all due for inspection in the next 2 years).

#### 3.1.2 In-country needs assessment

We will conduct a 1-week in-country visit in order to consult with representatives from the key stakeholder agencies and gather additional data to inform the planned training courses and subsequent phases of the project. The proposed high-level agenda for the visit, which will be led by the Mark, Polly and the Expert Trainer on Financial Investigation and Asset Recovery (William Durrant) (see “Team Structure and Composition”), is as follows:

**Day 1:** Meetings with RSS and ARIN-CARIB Secretariat representatives.

**Days 2 - 4:** Consultations with key agency representatives from participating jurisdictions with the possibility for one team member to travel to cover additional meetings in one other jurisdiction during this period if needed.

<sup>3</sup> NB - a detailed breakdown of the project stages can be found in section 6 - “Work Plan / Delivery Schedule”

<sup>4</sup> Jamaica’s was removal from the grey-list in 2024. The BVI’s is currently the only Caribbean jurisdiction on the grey-list.

**Day 5:** Preparation and delivery of half-day plenary session with representatives from all key jurisdictions/ agencies to present back and validate findings and conclusions from the preceding consultations.

The primary base for this needs assessment will be discussed and agreed with RSS and IDB. Both Barbados and Jamaica may be strong options to consider in terms of accessibility for representatives travelling from other jurisdictions, profile within the ARIN-CARIB network, and capacity to host meetings and consultation sessions. Barbados has the added advantage of being host to the Permanent Secretariats of ARIN-CARIB and RSS Asset Recovery Unit (ARU).

### 3.1.3 Training curriculum development, validation and reporting

The collective findings of the needs assessment activities will be analysed by the team and the insights used to develop a needs-based training curriculum and delivery work plan. Where necessary, the team will seek a final round of remote feedback from key stakeholders before incorporating the final proposed curriculum and workplan into a comprehensive Inception Report (see **Deliverable 1** below) for submission to RSS and IDB.

**Note on selection of training participants:** It is essential that the training participants comprise those who are highly likely to staff or have oversight or operational responsibility for a JIT. These may come from a range of backgrounds as outlined below, and care will be taken to discuss selection with agencies, to ensure a mix of the two levels in the table below, and the right mix of the job titles mentioned, depending on the specifics of the jurisdiction.

| Focus                                | Level/profile of agency participants required                                                                                                                                                                                                                                   | Main functions/expertise                                                                          |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| <b>Legal &amp; policy components</b> | <ul style="list-style-type: none"> <li>- Senior leadership (agency heads, directors, commissioners)</li> <li>- Senior legal advisors</li> <li>- National JIT coordinators or designated focal points</li> <li>- Prosecutors or judicial authorities with JIT mandate</li> </ul> | Authority to negotiate and approve agreements, legal and policy expertise, strategic oversight    |
| <b>Operational components</b>        | <ul style="list-style-type: none"> <li>- Mid-level operational managers (unit chiefs, team leaders)</li> <li>- Investigators, intelligence analysts, and practitioners</li> <li>- IT/data security officers</li> <li>- Administrative/technical staff as needed</li> </ul>      | Practical/operational knowledge, day-to-day process expertise, implementation and troubleshooting |

### 3.1.4 Key Phase 1 deliverable

| No. | Deliverable      | Key content                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Expected delivery timeline                                                                                                                                                          |
|-----|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | Inception report | <ul style="list-style-type: none"> <li>• Summary of needs assessment activities delivered, the corresponding findings and conclusions</li> <li>• Proposed training curriculum (incl. breakdown of topics, learning outcomes and target participants for each session)</li> <li>• Proposed work plan for training delivery (incl. Schedule, delivery modalities/locations and logistics considerations and requirements for each session)</li> <li>• Proposed training evaluation tools</li> </ul> | <ul style="list-style-type: none"> <li>• Draft report shared in Week 10-11 (depending on time agreed for RSS and IDB feedback)</li> <li>• Final report shared in Week 12</li> </ul> |

## 3.2 Phase 2: Training delivery and evaluation (~5 months)

Phase 2 will be used to deliver the core training sessions proposed under the project, evaluate participant learning and collect feedback and additional insights from the participants to inform the design of the proposed JITs framework and supporting procedures to be developed under Phase 3.

### 3.2.1 Production of training materials and organisation of logistics

Incorporating any feedback from RSS and IDB on the contents of the Inception Report, the team will finalise the training curriculum and develop the materials required for each session. This will include timed agendas, powerpoint training decks, supplementary handouts, practical exercises, participant learning assessments and post-training feedback forms. We will coordinate with RSS, IDB, and the relevant local stakeholders to confirm training dates and locations, and distribute invitations, agendas, and joining instructions to participants.

Below is our proposed training plan. This will be validated during the needs assessment, and then the specific training curriculum drafted:

| Draft training plan        |          |          |
|----------------------------|----------|----------|
| Session                    | Modality | Duration |
| 1: Foundational Principles | Virtual  | 4 hours  |

|                                                                                                         |                           |         |
|---------------------------------------------------------------------------------------------------------|---------------------------|---------|
| 2: Advanced Principles                                                                                  | Virtual                   | 4 hours |
| 3: Multi-Agency & Multi-Jurisdictional JITs, Part 1: Key Concepts and Coordination Strategies           | In-person<br>- Location 1 | 2 days  |
| 4: Multi-Agency & Multi-Jurisdictional JITs, Part 2: Immersive Case Simulation and Operational Practice |                           | 3 days  |
| 3: Multi-Agency & Multi-Jurisdictional JITs, Part 1: Key Concepts and Coordination Strategies           | In-person<br>- Location 2 | 2 days  |
| 4: Multi-Agency & Multi-Jurisdictional JITs, Part 2: Immersive Case Simulation and Operational Practice |                           | 3 days  |
| Post-training feedback session with selected agency reps                                                | Virtual                   | 1 hour  |

Further detail on each of these proposed sessions is outlined in the sub-sections below. For the planned in-person sessions, we will confirm the training venues, liaise with the participants attending from outside the host jurisdictions to ensure they are able to make the necessary travel and accommodation arrangements<sup>5</sup>, and organise our own team's travel as required.

### 3.2.2 Sessions 1 & 2: Foundational Principles, Advanced Principles

These first two virtual training sessions will be used to complete baseline knowledge testing of the participants and instill key principles and concepts which will form the foundation on which the subsequent in-person sessions will build. These sessions will both be delivered **virtually** via Zoom (or an alternate online platform if required by RSS or the participating agencies). We will ensure a minimum of 70 participants total across the two sessions.

*Indicative topics may include:*

- Key legislation (e.g. Organised Crime, Proceeds of Crime etc.) and international standards (e.g. FATF, UNCAC, EU Directives, Eurojust, Europol etc.)
- Practicalities of establishing JITs (JIT formation and operational procedures, trust-building, leadership and team management, joint protocols, case-specific planning, and legal/practical obstacles)
- Workshop sessions on intelligence, investigations and prosecutions best practice in JITs: Sources and types of intelligence (incl. OSINT, overseas intelligence and financial profiling, financial evidence at scenes); Illicit Financial Flows (incl. typologies and red flags); Freezing and confiscation strategies; Legal strategies for successful prosecutions
- Practical exercise: design a JITs roadmap for your jurisdiction and present it to the group

**Learning acquisition & evaluation tools:** Baseline participant knowledge will be established via dissemination of an online quiz to be completed during Session 1 with results generated live for the trainers. This, along with similar data gathered through the previous needs assessment phase, will be used to establish a baseline against which subsequent learning acquisition scores will be compared to support assessment of the effectiveness of the project's capacity-building interventions.

Participants will also be asked to complete a *feedback survey* at the end of each session which will be designed to capture i) changes in participants knowledge and skills; ii) broader participant perceptions and feedback regarding the value and quality of the training, its relevance to their role and institution, and any suggested improvements for future consideration. The design of all learning and feedback tools will be validated with RSS and IDB prior to their use.

The requirement to complete these surveys will be flagged at the beginning of each session and time for its completion factored into the agenda to support maximum completion rates. The results will be processed and analysed by the team for incorporation into subsequent reporting (see Section 3.2.5 below) and to inform any refinement of the content and materials for subsequent sessions. The trainers will also take notes from the JITs roadmaps presented by participants in the practical exercise (see above) to gain a better understanding of any gaps in the understanding of the principles, and challenges posed in each jurisdiction.

### 3.2.3 Sessions 3 & 4: Multi-Agency & Multi-Jurisdictional JITs, Part 1: (Key Concepts and Coordination Strategies) and Part 2 (Immersive Case Simulation and Operational Practice)

In order to achieve maximum jurisdictional coverage, participant experience and value for money, we are proposing to deliver Sessions 3 and 4 of the training concurrently, and to provide this part of the course in two different locations (to be agreed with RSS and IDB) over two weeks. Mark and William (see "Team Structure and

<sup>5</sup> As clarified by IDB during the bidding process, the Bank will coordinate separate funding to cover the travel and accommodation costs of the training participants.

Composition”) will deliver Sessions 3 and 4 in Location 1. They will then travel to Location 2 and provide the same Sessions to a second cohort. We will ensure a minimum of 70 participants total across the two locations.

**Session 3** will last 2 days and primarily feature didactic (teacher-centric) trainer input, aiming to develop knowledge of key concepts and investigations skillsets, and provide advice on how to use these within the framework of internationally recognised investigative best practice models. Learning will be consolidated through individual and group participation in practical exercises that are aligned to each of the module topics, followed by group discussions to compare regional perspectives and encourage participants to relate the concepts to their experience. Practical exercises will feature throughout Session 3, to maximise engagement and encourage practical application of the principles, whereas Session 4 is a complete live case study. Indicative topics may include:

- Case Management, Case Supervision and Case File Preparation
- Roles within Joint Investigation Teams
- Role and responsibilities of the national FIU
- Intelligence exploitation and sharing
- Financial account analysis
- Mutual Legal Assistance (MLA) and evidence
- Legal Strategies for successful prosecution and stand-alone money laundering

**Session 4** will last 3 days and focus on developing a hypothetical investigation from the starting point of receiving intelligence to preparing a case file for prosecuting authorities, including recommendations relating to further enquiries, requests for evidence from overseas jurisdictions and a suggested strategy for confiscating any identified criminal assets. Throughout the 3 days, new facts will come to light in a “paper-feed exercise” which mirrors key points from the previous training, forcing the teams to re-assess their position and adapt accordingly. The aim is to establish a decision-making approach among the teams, which they can adopt into their work in JITs (training a problem-solving approach in investigations and in establishing the JIT). The exercise is conducted in groups, with the decision-making role rotated, so that all participants must take responsibility for the management of the investigation at various stages, and so that their performance in the leadership role can be assessed.

**Additional post-training evaluation mechanism:** In addition to face-to-face trainer assessment of participant knowledge and capacity uptake during these sessions and the usual *feedback survey*, the training participants will be asked to undertake an additional **organisational self-assessment** when they return to their respective institutions. They will be provided with a structured questionnaire (one per agency), designed to enable them to reflect on their own roles and organisation’s processes and how these align with the topics and concepts explored during the training course. They will be asked to submit their responses 1 week after the conclusion of the final training session and to nominate a representative who will participate in a plenary session with the project team to present, discuss and reflect on the results. The findings gathered from this exercise will be used to inform the reporting for this phase but also, crucially, to inform the design of the framework and SOPs to be developed under Phase 3 of the project.

### 3.2.4 Post-training evaluation and reporting

Following the conclusion of the training sessions, the project team will collate, process and analyse the data from:

- the completed *feedback survey* from each session;
- the trainer observation records from each session (including on the draft JITs roadmaps presented by participants in Sessions 1 & 2); and
- the results of the post-training organisational self-evaluation and plenary discussion

This analysis will be used to produce two key reporting deliverables:

- A **Financial Investigations and Asset Recovery (FIAR) Training Report** - the purpose of which will be to document the training delivered, provide evidence of the participants in attendance, and present the learning acquisition results.
- A **Post-Training Evaluation Report** - the purpose of which will be to present our assessment of the effectiveness of the training activities delivered, the actual level of the participating institutions’ financial investigation practices and capabilities (i.e. readiness to establishment and participate in JITs), residual gaps in knowledge, skills and capacity and corresponding recommendations for remedial training and capacity-building initiatives to address them.

See Deliverables 2 and 3 below for further details on these reports.

### 3.2.5 Key Phase 2 deliverables

| No. | Deliverable   | Key content                                                                   | Expected delivery timeline |
|-----|---------------|-------------------------------------------------------------------------------|----------------------------|
| 2   | FIAR Training | • Summary of training activities prepared and delivered, including key topics | Report delivered           |

|   |                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                             |
|---|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
|   | Report                          | covered, participants in attendance etc. <ul style="list-style-type: none"> <li>• Learning acquisition and feedback results</li> <li>• Trainer observations</li> <li>• Attached agendas, presentations and attendance sheets from each session</li> <li>• Training photos</li> </ul>                                                                                                                                                                                                                                    | in Month 7                  |
| 3 | Post-training Evaluation Report | <ul style="list-style-type: none"> <li>• Assessment of the effectiveness of the training activities delivered</li> <li>• Assessed actual level of the participating institutions' financial investigation practices and capabilities (i.e. readiness to establishment and participate in JITs)</li> <li>• Summary of residual gaps in knowledge, skills and capacity</li> <li>• Recommendations for remedial and follow on training course to support on-going learning and address identified capacity gaps</li> </ul> | Report Delivered in Month 8 |

### 3.3 Phase 3: Framework design and consultation (~3 months)

In Phase 3 we will use the body of understanding and data accumulated via the Phase 1 and 2 activities to develop a clear, context-sensitive framework to support the establishment of JITs in the region. GovRisk has significant experience working hand in hand with agencies to develop this capability and understands how to successfully integrate the legal-, policy- and operational-level considerations into a cohesive framework that is harmonised to working realities of the participating agencies. The framework should anticipate the typical challenges which jurisdictions will encounter in their development of JITs (including as a result of the jurisdiction's particular governance dynamics), and equip officials with practical tools to address them. The team will liaise closely with key agencies at different levels (see box below), using their insights and our technical and political economy expertise to identify and analyse these challenges before finalising the framework. We will form a steering committee for the Phase 3 design, with representatives from 5-8 jurisdictions (selected on a similar basis to the criteria set out in Phase 1). This steering committee will be responsible for ensuring the Phase 3 outputs align well with the anticipated needs of the whole region.

#### Engaging at the correct level for each component of the framework:

Development of the **model agreement and policy framework** will require engagement with senior officials or legal experts with the authority to commit the agency and shape high-level policy and legal frameworks.

Formulation of the **SOPs and supporting MOUs** will require close consultation with operational staff who have direct experience with investigative processes, inter-agency cooperation, and the practicalities of information exchange and joint operations.

#### 3.3.1 Development of model agreement and policy framework

This level of development will primarily be led by the Expert in Commonwealth Criminal Law (Francis Burak) and the Expert in JIT Design (Helen Kay Knipe) (see "Team Structure and Composition"), in close coordination with senior leadership (e.g. agency heads, directors, commissioners), senior legal advisors, national JIT coordinators or designated focal points, and prosecutors or judicial authorities with JIT mandate.

Key content and drafting principles for both the model agreement and the policy framework will be distilled from relevant international models and best practice, and the findings and insights already gathered (via the previous desk-based review of existing laws, regulations and procedures; stakeholder needs assessment; the completed training exercises; and post-training evaluations) and validated with the participating stakeholders.

In line with this content guide, the co-created **model agreement** will:

- Clearly identify all parties to the agreement and their respective roles and responsibilities.
- Set out the purpose, scope, and mandate of the JIT, including the specific offences or cases to be investigated and the governance structure
- Establish the duration of the JIT, with procedures for extension or early termination
- Define the team composition, leadership structure, and criteria for membership and participation.
- Outline the legal basis and available mechanisms for information sharing, evidence handling, confidentiality, and data protection.
- Address financial and logistical arrangements, including resource allocation and cost-sharing.
- Ensure compliance with relevant international standards and legal frameworks, including human rights and civil liability.
- Specify procedures for closure and post-operation reporting
- Include mechanisms for amending the agreement and adding new parties if required.

The **policy framework** will be drafted to:

- Outline overarching policy statements that guide the establishment, operation, and dissolution of JITs.
- Set out requirements for proposing, authorizing, and establishing JITs, including required documentation and approval processes.
- Establish governance and accountability for the JIT members, and give clarity on decision-making, dispute resolution, and the inclusion of additional parties or external experts as needed.
- Define principles for membership, participation, and inter-agency or cross-border cooperation, including engagement with external partners and non-member states.
- Establish high-level standards for operational conduct, information sharing, and safeguarding sensitive or personal data.
- Outline requirements for monitoring, evaluation, and continuous improvement, including mechanisms for capturing lessons learned and best practices.
- Include provisions for capacity building, training, and knowledge sharing among participating agencies.
- Provide guidance on sustainability and the periodic review and update of the framework to reflect evolving threats and operational experience.

### 3.3.2 Formulation of SOPs

This level of development will primarily be led by Mark and William who will need to coordinate closely with a range of operational-level personnel from across the participating agencies. This will include: mid-level operational managers (e.g. unit chiefs, team leaders); investigators, analysts, and practitioners; IT/data security officers (for data sharing protocols); and administrative/technical staff as needed.

By this point in the project, the team will already have a solid working knowledge of the participating agencies' operational needs and capabilities, the governance and decision-making approaches in the jurisdictions, and the strengths and weaknesses in their existing SOPs. This will be used to refine the key content and drafting principles for new and/or updated SOPs which will then be validated and agreed with participating stakeholders.

Our team will draft the new SOP content collaboratively with the steering committee, providing clear, practical guidance for all stages of JIT operations, promoting consistency, legal compliance, and operational efficiency. Cross-team coordination will ensure compatibility with the legal and policy-level frameworks already in development. The SOPs will include, but not be limited to, the following key elements:

1. Establishment and Composition of JITs
  - Procedures for initiating and establishing a JIT, including criteria for participation and appointment of the JIT leader.
  - Roles and responsibilities of national and seconded members, including authority and reporting lines.
2. Operational Planning and Coordination
  - Steps for joint operational planning, including the development of operational action plans and coordination of investigative and prosecutorial activities.
  - Mechanisms for regular communication, periodic meetings, and decision-making within the JIT.
3. Intelligence and Evidence Sharing
  - Protocols for secure and timely exchange of intelligence and evidence among JIT members, respecting national legislation and the "speciality rule" on the use of shared information.
  - Procedures for requesting and carrying out investigative measures across jurisdictions.
4. Conduct of Investigations
  - Guidance on the coordinated conduct of parallel and joint investigative activities, including the secondment of personnel and participation in operational phases such as arrests and searches.
  - Procedures to avoid duplication of effort and ensure the protection of vulnerable witnesses.
5. Legal and Procedural Safeguards
  - Adherence to applicable national and international legal frameworks, including rules on civil liability, data protection, and evidence admissibility.
  - Mechanisms for resolving legal or operational disputes within the JIT.
6. Documentation and Record-Keeping
  - Standardized templates and protocols for documenting decisions, actions, and outcomes.
  - Requirements for maintaining records in accordance with legal and policy requirements.
7. Financial and Logistical Arrangements
  - Procedures for cost estimation, resource allocation, and financial management of JIT activities.
  - Guidance on logistical support, including travel, accommodation, and equipment needs.
8. Closure, Evaluation, and Reporting
  - Steps for the orderly closure of the JIT, including final reporting and evaluation of outcomes.

### 3.3.3 In-country stakeholder consultation, framework reporting and pilot phase planning

In addition to regular remote consultations and virtual sessions with the key agency representatives throughout the framework development process, Mark, Helen and Francis will plan to spend up to 5-days in the region to conduct in-person meetings and drafting/review workshops with the key stakeholders. The precise sequence and timing of the in-country visits will be confirmed with the relevant agencies in the planning stages for this phase of the project to ensure these are strategically timed to maximise their value and capitalise effectively on the opportunity for in-person collaboration on the drafts. Once complete, the input and feedback collected through all stakeholder consultations will be collated and used to further update and refine each of the framework components which will then be compiled for submission to RSS and IDB (see Deliverable 4 below).

This time will also be used to confirm the jurisdictions selected to participate in the subsequent pilot implementation phase, to agree the specific expectations for their involvement and establish a schedule of supporting mentoring and evaluation activities. Please see Section 3.4 below for further details on the scope, content and features of the Pilot Phase.

### 3.3.5 Key Phase 3 Deliverables

| No. | Deliverable                                                            | Key content                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Expected delivery timeline      |
|-----|------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| 4   | Model agreement, policy framework & SOPs for Joint Investigation Teams | <ul style="list-style-type: none"> <li>The Model Agreement will set out the legal basis, parties, roles and responsibilities, scope, duration, team structure, information sharing mechanisms, financial and logistical arrangements, compliance requirements, closure, and amendment procedures for establishing and operating Joint Investigation Teams.</li> <li>The Policy Framework provides the wider supporting guidance for the Model Agreement's adoption. This includes overarching principles and guidelines for the establishment, governance, membership, operational standards, data protection, monitoring, capacity building, and periodic review of Joint Investigation Teams.</li> <li>The SOPs provide agencies with the means to bring JIT functions into their day-to-day institutional setup. This includes team establishment, roles, operational planning, intelligence and evidence sharing, investigative conduct, legal safeguards, documentation, financial and logistical management, and closure—to ensure consistency, legal compliance, and operational efficiency.</li> </ul> | Documents delivered in Month 10 |

### 3.4 Phase 4: Pilot implementation and final reporting (~7 months)

This phase is designed to ensure the framework's practical applicability, regional relevance, and capacity to facilitate effective cross-border investigations. We will deliver a pilot implementation period which will operationalize the developed JITs framework in selected jurisdictions, providing a real-world test of the model agreement, policy framework, and SOPs. This phase will leverage structured evaluation frameworks and a combination of expert and peer mentoring to ensure rigorous assessment, continuous improvement, and strong regional ownership of the JITs model in practice. Feedback and data collected from this pilot exercise will then be used by the project team to make any relevant adjustments to the framework and prepare final project reporting for RSS and IDB.

#### 3.4.1 Selection and preparation

Pilot jurisdictions (a minimum of 3) will be selected in consultation with RSS and IDB - (see "Note on jurisdiction selection" in section 3.1.1 above for indicative criteria to be considered in this selection). We will also have learned from the representatives on the steering committee mentioned in Phase 3 (see above). Participating agencies will receive targeted briefings and orientation on the framework, with practical guidance on using the model agreement, policy framework, and SOPs.

#### 3.4.2 Operational testing, remote peer-to-peer mentoring

The pilot jurisdictions will establish JITs in accordance with the new framework, choosing real or simulated investigations to work on in those JITs, depending on current caseloads and so that the JIT is focused on typical transnational crime challenges in the region. With remote expert mentorship from our team, agencies will apply the SOPs to manage case initiation, information sharing, evidence handling, inter-agency coordination, and asset recovery processes.

Throughout the pilot, project staff will provide hands-on support and troubleshooting to ensure fidelity to the framework and to capture any operational issues as they arise. Dedicated remote mentoring will be provided by project experts, offering real-time guidance and support to participating agencies as they implement the framework and navigate challenges. A structured peer-to-peer mentoring mechanism will also be established, enabling agencies to share experiences, compare approaches, ask for advice, and collaboratively resolve issues. This may

include regular virtual roundtables, discussion forums, and direct communication channels to foster knowledge exchange and mutual learning.

### 3.4.4 Performance measurement

A set of Key Performance Indicators (KPIs) will be developed in collaboration with stakeholders, focusing on investigative timelines, quality and frequency of information exchange, inter-agency cooperation, and asset recovery outcomes. Key reflection points will be selected for each pilot jurisdiction, to allow agencies to step back and assess whether the JIT is delivering measurable progress in cooperation, investigations or asset recovery. Data will be systematically collected throughout the pilot to assess progress against these KPIs, using both quantitative and qualitative methods, and to embed the KPIs in the agencies' day-to-day work. These KPIs and data collection methods are designed for ongoing use by jurisdictions beyond the project, enabling countries to monitor JIT development, maintain political will, and provide evidence of progress—particularly in response to FATF requirements for statistics on investigations and asset recovery outcomes.

### 3.4.5 Feedback and learning

Structured debriefing sessions, surveys, and interviews will be conducted with all participating agencies to capture feedback on the framework's strengths, challenges, and operational realities. Lessons learned and recommendations for refinement will be documented, with particular attention to barriers to effective cooperation and opportunities for further capacity building.

### 3.4.6 Reporting and refinement

A comprehensive report will be prepared, summarizing pilot activities, performance against KPIs, feedback from stakeholders, and concrete recommendations for improving the framework. Proposed adjustments will be validated with participating agencies before finalization, ensuring the framework is robust and fit for broader regional adoption. See Deliverable 5 below.

### 3.4.7 Final reporting and project closure

We will undertake a structured final reporting process that synthesizes all key activities, outcomes, and lessons learned from the pilot implementation of the JITs framework and preceding project activities. The Final Evaluation Report will:

- Summarise qualitative and quantitative feedback from all participating law enforcement agencies, prosecutors, and asset recovery experts involved in the pilot phase.
- Provide a critical analysis of the project's interventions, highlighting key successes, challenges, and lessons learned. This analysis will then be added to the Phase 3 outputs, so that the remaining jurisdictions in the region benefit from the lessons learned in the pilot phase.
- Offer practical recommendations, informed by pilot outcomes and stakeholder engagement, to support the ongoing institutionalisation and long-term viability of JITs in the Caribbean
- Suggest approaches for embedding JITs within existing national and regional security structures to maximize their operational impact
- Identify future training and capacity-building needs, recommending targeted initiatives and suitable delivery formats (such as in-person, virtual, or hybrid), with reference to established best practices and relevant resources

A draft of the final report and a summary presentation will be submitted first to RSS and IDB for review. All feedback and comments will then be addressed and incorporated into the final versions.

### 3.4.8 Key Phase 4 Deliverables

| No. | Deliverable                                           | Key content                                                                                                                                                                                      | Expected delivery timeline   |

## 4. Team Structure and Composition

Our proposed team for this project combines deep technical understanding of the subject matter with high-quality project management expertise and extensive practical experience developing successful JITs, supporting financial investigations and asset recovery across the Caribbean and tailoring international best practice to a range of contexts. The core team includes:

**1. Mark Heffer – Project Lead:** An Accredited Financial Investigator (accredited by the UK's National Crime Agency) specialising in financial crime investigations and intelligence-led operations, Mark has designed and managed delivery of strategic and capacity-building initiatives for law enforcement agencies and prosecutors in over 20 countries, including across the Caribbean, with a focus on enhancing investigative capabilities and inter-jurisdictional cooperation. **Mark** will lead the delivery team, providing strategic oversight and coordinating tasks and responsibilities across team members. He will be the senior technical point of contact for IDB/RSS and co-lead the design and delivery of the needs assessment and training activities, participating in the assessment mission and in-person training. In later phases (Phase 3 & 4), Mark will support operational activities, consulting with law enforcement agencies and contributing to the SOPs and take a more supporting role in the design of legal frameworks and inter-jurisdictional arrangements alongside Helen.

**2. Helen Hay Knipe – Expert in JIT Design:** Helen is an experienced prosecutor and criminal justice advisor with over 20 years' specialising in international cooperation and JITs. As a Senior Prosecutor with the Scottish Crown Office and Procurator Fiscal Service's International Cooperation Unit for over five years, she was responsible for drafting legal instruments, managing cross-border operations, mentoring colleagues, and conducting over 60 extradition hearings. She has served as an operational prosecutor on several high-profile transnational cases under JIT frameworks and has experience designing and negotiating JIT agreements. **Helen** will contribute to the desk-based review, needs assessment, and development of training content, and deliver virtual training sessions. Helen will also co-lead Phases 3 and 4 alongside Francis, contributing to the design of legal frameworks, model agreements, and operational procedures, drawing on her experience in complex international judicial cooperation.

**3. Francis Burak – Expert in Commonwealth Criminal Law:** Francis is a dual-qualified lawyer for the CARICOM Caribbean, with nearly 20 years' experience as a practicing Barrister and international adviser. He is a dedicated asset recovery and anti-corruption professional, with extensive field experience across the Caribbean working at both practitioner and policy levels. **Francis** will lead the legal and regulatory analysis, conducting desk-based reviews of existing laws, regulations, and jurisdictional procedures. He will contribute to the development of legal components for the training curriculum and play a lead role in Phase 3, working closely with Helen to develop the model agreement and policy framework. During the pilot phase, Francis will also provide mentoring support to national counterparts to strengthen legal understanding and application.

**4. William Durrant – Expert Trainer on Financial Investigation and Asset Recovery:** William is a highly experienced financial crime specialist with over three decades of expertise in financial investigation and asset recovery. A retired Detective Constable from the Metropolitan Police Service, William has led and delivered training and consultancy projects across the Caribbean, the UK, Europe, Africa, and the Middle East, working with law enforcement agencies, prosecutors, regulators, and the private sector. **William** will co-lead the training needs assessment and delivery of training sessions, drawing on his extensive operational experience to tailor content to practitioner needs. He will contribute to post-training reporting and provide recommendations for further capacity development. In Phases 3 and 4, William will play a supporting role, contributing an operational perspective to the development of frameworks and agreements, mentoring law enforcement agencies, and advising on the practical application of procedures developed under the project.

**5. Polly Calvert – Senior Project Manager:** Polly is an experienced international project manager who has successfully delivered over 20 technical assistance projects over the past 9 years, managing assignments for donors such as the UK Foreign, Commonwealth & Development Office (FCDO), US Department of State (DoS), and European Bank for Reconstruction and Development (EBRD). Polly will oversee the full project cycle, including the coordination of project activities, financial management, stakeholder engagement, monitoring and evaluation, and the timely delivery of all project outputs in line with agreed work plans and budgets. She has particular experience managing projects involving law enforcement cooperation, Joint Investigation Teams (JITs), and international asset recovery, having supported programmes that strengthen operational collaboration between law enforcement, prosecutors, FIUs, and regulators, notably in the Caribbean and Asia. **Polly** will lead on client communications, including coordination of the bi-weekly check in meetings, ensure timely delivery of quality deliverables, provide structured and transparent reporting to IDB, and generally coordinate project delivery.

## 5. Project Management

### 5.1 Overall approach - emphasising experience delivering on time, on budget,

GovRisk has a proven track record of delivering complex technical assistance assignments on time, on budget, and to the highest professional standards. The project will be supported by GovRisk's experienced Project Management Unit (PMU) based in London, which provides full administrative, logistical, financial, and reporting support, enabling

effective day-to-day coordination across the delivery team, close monitoring of project progress and resource allocation, and proactive risk management. Polly and the PMU will work seamlessly with Mark and the technical team to ensure smooth execution, while the London office infrastructure provides the necessary tools for remote collaboration, client communication, and efficient information sharing, reinforcing our commitment to cost-effectiveness, accountability, and high-quality delivery.

## 5.2 Client Communications & Reporting

GovRisk is committed to maintaining transparent, responsive, and accountable communication with IDB throughout the project lifecycle. In addition to the submission of all formal deliverables, GovRisk will provide IDB with regular bi-weekly written progress updates and calls. These will outline key activities, milestones achieved, emerging issues, and planned next steps. GovRisk will provide a monthly monitoring report before the 8th of every month, with Red/Amber/Green status against all objectives, proactive monitoring of risks and details of mitigation measures (or any other significant actions taken) shared with IDB. All final deliverables will be submitted electronically in English, in line with the delivery schedule (see Section 3) and the work plan (see Section 6).

GovRisk's reporting approach provides IDB with full visibility of project performance, promotes early identification of any challenges, and facilitates collaborative problem-solving where needed. Polly (see "Team Structure and Composition") will serve as the central point of contact for all client communications, supported as needed by the relevant technical leads for specific issues, or occasionally by other GovRisk staff, provided at no cost to the project (e.g. to draw on examples from other programmes).

### 5.2.1 Expectations from the Bank - describe any expectations from the Bank that would be needed to prepare and deliver the services as required under this RFP.

In order to ensure smooth implementation and timely delivery of services, GovRisk notes the following expectations and areas where IDB's input and coordination would be welcomed:

- Participation in bi-weekly coordination calls (or written feedback on progress updates, if a call is not required) to review progress, discuss upcoming activities, and address any challenges that might arise.
- Confirmation of cost coverage arrangements for training participants' travel and accommodation, as previously agreed in the clarification question sent (on 11 June 2025).
- Provision of input on jurisdictional selection criteria to inform project scoping and ensure alignment with IDB's strategic priorities.
- Timely feedback on draft deliverables to facilitate finalisation in line with the agreed timeline, or within a maximum of 10 working days.
- Where appropriate, facilitation of stakeholder introductions and coordination to support the engagement of relevant national counterparts.

## 5.3 Risk management

GovRisk applies a structured and proactive approach to risk management and quality assurance to ensure smooth implementation and delivery of high-quality results. We recognise that capacity building for JITs in the Caribbean involves coordination across multiple jurisdictions, different legal frameworks, and the engagement of multiple stakeholders. To manage these complexities, GovRisk will maintain continuous oversight of project progress, stakeholder engagement, and emerging risks.

At project initiation, a detailed risk register including mitigation strategies will be developed and maintained throughout implementation. Regular bi-weekly coordination meetings with IDB will serve as an early warning mechanism to monitor emerging issues and ensure that risks are addressed collaboratively and in a timely manner.

## 5.4 Quality Assurance

Our quality assurance processes are embedded at every stage of the project lifecycle. All technical outputs, including legal frameworks, standard operating procedures, training materials, and operational guidance documents, will be subject to internal peer review by senior technical experts to ensure they meet the highest professional standards, reflect regional contexts, and respond to the needs of participating jurisdictions. Project management outputs, reports, and evaluation and learning deliverables will undergo separate quality assurance by the Project Director, ensuring consistency, accuracy, and full alignment with client expectations.

## 6. Work Plan / Delivery Schedule

[illegible]

[illegible]

## 6. Proposed modifications/ improvements to the ToR

We propose the following amendments to the ToR as written:

- **A shorter overall time frame (18 months, rather than 21) presenting better value for money.** By tightly scheduling the initial kick-off activities, and having a well-formed plan for the structure of the training, we are able to efficiently conclude those stages of the project. This will allow more of the budget to be invested in the other deliverables, rather than extending the liaison efforts with jurisdictions over a longer period of time.
- **Adding an organisational self-assessment to the end of the training course.** Our experience of supporting Caribbean jurisdictions' assessment of their policies and procedures (see earlier references to our regional anti-corruption benchmarking exercise in 2016) indicates that a structured, technical questionnaire adds considerable high-quality data if it is completed carefully and in due time. By carefully selecting the training participants (see the box in Section 3 - "Selecting Training Participants") we can make the most of their presence by completing this additional piece of diagnostic work much earlier than would otherwise be possible. This helps us to kick off our data collection and calibrate our remaining requests for information. This makes the framework provided by the project more tailored to the jurisdictions' needs and therefore more likely to have sustained impact over time.
- **Facilitating peer-to-peer mentoring as part of the pilot implementation phase.** By carefully selecting our pilot jurisdictions in part for their ability to actively conduct ongoing mentoring sessions with peer jurisdictions, we can strengthen an essential part of the project's aims for impact across a wide number of jurisdictions. In addition to the structured follow-ups relating to ARIN-CARIB, FATF etc. we will establish a forum between participating jurisdictions, building links between investigators, to provide peer support to one another. This support may be operational/tactical, or strategic/systemic - either way this will contribute to jurisdictions' long term uptake of the deliverables produced by this project.

## 8. Annex H

Section 3.6.1 provides a schedule for this project, indicating the timeframes expected for major tasks.

Please refer to Section 6. Work Plan / Delivery Schedule in Annex G, page 18-19.

## 9. Annex I – Certification of Personnel/ Curriculum Vitae (CV)<sup>6</sup>

Section 3.7.1 Provide the resumes of the staff that would be assigned to this project if the CF were selected for contract award.

## 10. - Statement and Ethics Policy<sup>7</sup>

### Section 3.7.2. Ethics and Grievance Policy

GovRisk maintains a comprehensive suite of formal, written policies that govern ethics, grievance reporting, and whistleblowing. The *Code of Conduct* outlines strict standards on anti-bribery, anti-corruption, anti-fraud, conflicts of interest, equal opportunities, health and safety, counter-terrorism compliance, and data protection, aligned with international best practice and legislation such as the UK Bribery Act 2010.

The *Whistleblowing Policy* provides clear and confidential mechanisms for all personnel, contractors, and partners to report suspected wrongdoing or misconduct, with protections in place under the UK Public Interest Disclosure Act 1998. Reports can be submitted directly to designated company directors or the non-executive director and are promptly investigated with full respect for confidentiality.

The *Complaints Policy* offers employees and external stakeholders a transparent process to raise grievances or concerns, ensuring timely investigation, documentation, and resolution. The policy supports open dialogue, fair treatment, and continuous improvement, with complaints feeding into periodic performance reviews to address any systemic issues.

GovRisk's integrated policies ensure staff and stakeholders can safely report concerns and are protected by clear, enforceable procedures for investigation and resolution. Full policies are attached at the of the document of this submission.

<sup>6</sup> All CVs can be found at the end of the document

<sup>7</sup> Ethics Policy attached at the end of the document

### Bio

Mark Heffer is a financial crime and criminal justice expert with 30+ years of experience, including extensive recent work in the Caribbean directly relevant to this assignment. He has led multiple projects focused on establishing financial investigation units, fostering joint agency cooperation, and supporting JIT coordination, with a strong emphasis on capacity building, training, and legislative review. Currently, he serves as Lead Consultant for PADF in Jamaica, conducting a comprehensive needs assessment across all law enforcement agencies to strengthen multi-agency cooperation, reform joint investigative protocols, and enhance intelligence sharing, asset recovery, and mutual legal assistance frameworks. He is also supporting the reform of a joint-agency fusion cell in Jamaica.

Mark has led delivery for multiple similar assignments, including as Subject Matter Expert for the Financial Crime Seminar for the Eastern Caribbean Judiciary (British Virgin Islands) and as lead trainer on multi-agency courses in Investigative Interviewing, Statement Taking, and Crime Investigation across Jamaica and the Eastern Caribbean. Across these assignments, he has advised on inter-agency task forces, investigative coordination, and JIT operational design. His global experience includes leading multidisciplinary teams on complex financial crime and counter-terrorism investigations, including as Team Leader for the FCDO-funded Somalia CFT Programme.

### Education:

**Canterbury Christ Church University, Kent, UK.** *September 1999 - September 2000.*

- **Post Graduate Certificate in Education**

**Trinity St Davids University of Wales, UK.** *September 1987 – June 1990.*

- **Undergraduate Degree - BA, Environmental Science**

---

### Bio

Helen is an experienced prosecutor and criminal justice advisor with over 20 years of expertise, specialising in international cooperation and joint investigation teams (JITs). As a Senior Prosecutor with the Crown Office and Procurator Fiscal Service's International Cooperation Unit for more than five years, she was responsible for drafting legal instruments and managing cross-border operations. Helen has served as an operational prosecutor on several high-profile transnational cases under JIT frameworks and has experience in the design and negotiation of JIT agreements. She is well-versed in the use of EU JIT agreement templates, which she routinely used as a foundation, adapting and amending them as needed, and is familiar with the operational standards and coordination mechanisms of EUROPOL and INTERPOL in the context of joint investigations. Her extensive practice reflects a deep understanding of the legal, operational, and procedural dimensions of international judicial cooperation in complex criminal investigations. In addition, Helen has delivered training for criminal justice sector professionals under international development projects funded by donors such as the UK Foreign, Commonwealth & Development Office (FCDO), bringing valuable capacity-building experience across multiple jurisdictions.

---

### Education:

#### University of Dundee. 2002-2003.

- Diploma in Legal Practice.

#### University of Essex, Colchester. 1999-2000.

- LLM International Human Rights Law., with distinction.

#### University of Glasgow. 1995-1999.

- LLB Scots Law with French Language, with Upper Second Class Honours.
- Including 1 year at Robert Schuman University, Strasbourg, France (Erasmus programme).
- Member of Law Society of Scotland (non-practicing Solicitor and Notary Public)

### Bio

Francis Burak is a Commonwealth criminal law expert with extensive experience conducting legal research, analysis, and advisory work on financial crime, anti-corruption, organised crime, and asset recovery across the Caribbean. He has participated in multiple legal reform and justice sector projects directly related to international cooperation and cross-border financial investigations, including long-term assignments in Jamaica, Turks & Caicos Islands, and Trinidad & Tobago. In these roles, Francis has conducted in-depth analysis of national legal and judicial systems to identify legal and procedural obstacles to effective cooperation in financial investigations, mutual legal assistance, and asset recovery, and has advised on the design of legislative reforms, institutional frameworks, and operational protocols to strengthen cross-border collaboration. His work has supported anti-corruption agencies, law enforcement, prosecutors, financial intelligence units, and courts, addressing both practical prosecutorial challenges and broader institutional reform needs. Francis holds a Legal Education Certificate from the Norman Manley Law School in Jamaica and is qualified to practice across Caribbean jurisdictions signatory to the CLE agreement.

---

| <b>Position Title and No.</b>           | Expert Trainer on Financial Investigation and Asset Recovery |
| <b>Name of Expert:</b>                  | William Peter Durrant                                        |
| <b>Country of Citizenship/Residence</b> | United Kingdom                                               |

### Bio

William Durrant is an experienced trainer and practitioner in financial investigation, asset recovery, and anti-corruption, with a strong record of delivering capacity building for law enforcement and prosecutors across multiple jurisdictions, including in the Caribbean. He has delivered 2 specialist trainings to law enforcement agencies in Trinidad & Tobago, independently and as part of wider international donor-funded programmes. William has over three decades of operational experience as a senior financial investigator and detective within the UK's Metropolitan Police Service, including service with the International Mutual Legal Assistance Unit and the Economic and Specialist Crime Directorate. Since 2012, he has led training missions across Europe, Africa, the Middle East, Asia, and the Caribbean, designing and delivering technical courses on financial investigations, asset tracing, confiscation, anti-money laundering, and international cooperation. His expertise includes mutual legal assistance, cross-border asset recovery frameworks, and multi-agency coordination. William holds multiple professional training qualifications and is an Accredited Counter Fraud Specialist.

The directors are satisfied that the company is entitled to exemption from the requirement to obtain an audit under section 477 of the Companies Act 2006.

The members have not required the company to obtain an audit in accordance with section 476 of the Act.

The directors acknowledge their responsibilities for complying with the requirements of the Companies Act 2006 with respect to accounting records and the preparation of accounts.

The accounts have been prepared and delivered in accordance with the special provisions applicable to companies subject to the small companies regime. The profit and loss account has not been delivered to the Registrar of Companies.

The members have agreed to the preparation of abridged accounts for this accounting period in accordance with Section 444(2A) of the Companies Act 2006.

These accounts are amended to replace the original accounts and now constitute the statutory accounts. These have been prepared as they were at the date of the original accounts.

Mr Dominic Le Moignan

Director

Approved by the board on 27 December 2023

**International Governance and Risk Limited**  
**Notes to the Abridged Accounts**  
**for the year ended 31 March 2023**

**1 Accounting policies**

***Basis of preparation***

The abridged accounts have been prepared under the historical cost convention and in accordance with FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland (as applied to small entities by section 1A of the standard).

***Turnover***

Turnover is measured at the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes.

***Tangible fixed assets***

Tangible fixed assets are measured at cost less accumulative depreciation and any accumulative impairment losses. Depreciation is provided on all tangible fixed assets, other than freehold land, at rates calculated to write off the cost, less estimated residual value, of each asset evenly over its expected useful life, as follows:

|                     |                      |
|---------------------|----------------------|
| Plant and machinery | 25% Reducing balance |
|---------------------|----------------------|

***Debtors***

Short term debtors are measured at transaction price (which is usually the invoice price), less any impairment losses for bad and doubtful debts. Loans and other financial assets are initially recognised at transaction price including any transaction costs and subsequently measured at amortised cost determined using the effective interest method, less any impairment losses for bad and doubtful debts.

***Creditors***

Short term creditors are measured at transaction price (which is usually the invoice price). Loans and other financial liabilities are initially recognised at transaction price net of any transaction costs and subsequently measured at amortised cost determined using the effective interest method.

***Taxation***

A current tax liability is recognised for the tax payable on the taxable profit of the current and past periods. A current tax asset is recognised in respect of a tax loss that can be carried back to recover tax paid in a previous period. Deferred tax is recognised in respect of all timing differences between the recognition of income and expenses in the financial statements and their inclusion in tax assessments. Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used. Current and deferred tax assets and liabilities are not discounted.

**International Governance and Risk Limited**  
**Notes to the Abridged Accounts**  
**for the year ended 31 March 2023**

***Provisions***

Provisions (ie liabilities of uncertain timing or amount) are recognised when there is an obligation at the reporting date as a result of a past event, it is probable that economic benefit will be transferred to settle the obligation and the amount of the obligation can be estimated reliably.

***Foreign currency translation***

Transactions in foreign currencies are initially recognised at the rate of exchange ruling at the date of the transaction. At the end of each reporting period foreign currency monetary items are translated at the closing rate of exchange. Non-monetary items that are measured at historical cost are translated at the rate ruling at the date of the transaction. All differences are charged to profit or loss.

***Pensions***

Contributions to defined contribution plans are expensed in the period to which they relate.

The directors are satisfied that the company is entitled to exemption from the requirement to obtain an audit under section 477 of the Companies Act 2006.

The members have not required the company to obtain an audit in accordance with section 476 of the Act.

The directors acknowledge their responsibilities for complying with the requirements of the Companies Act 2006 with respect to accounting records and the preparation of accounts.

The accounts have been prepared and delivered in accordance with the special provisions applicable to companies subject to the small companies regime. The profit and loss account has not been delivered to the Registrar of Companies.

The members have agreed to the preparation of abridged accounts for this accounting period in accordance with Section 444(2A) of the Companies Act 2006.

These accounts are amended to replace the original accounts and now constitute the statutory accounts. These have been prepared as they were at the date of the original accounts.

Mr Dominic Le Moignan

Director

Approved by the board on 31 March 2025

**International Governance and Risk Limited**  
**Notes to the Abridged Accounts**  
**for the year ended 31 March 2024**

**1 Accounting policies**

***Basis of preparation***

The abridged accounts have been prepared under the historical cost convention and in accordance with FRS 102, The Financial Reporting Standard applicable in the UK and Republic of Ireland (as applied to small entities by section 1A of the standard).

***Turnover***

Turnover is measured at the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes.

***Tangible fixed assets***

Tangible fixed assets are measured at cost less accumulative depreciation and any accumulative impairment losses. Depreciation is provided on all tangible fixed assets, other than freehold land, at rates calculated to write off the cost, less estimated residual value, of each asset evenly over its expected useful life, as follows:

|                     |                      |
|---------------------|----------------------|
| Plant and machinery | 25% Reducing balance |
|---------------------|----------------------|

***Debtors***

Short term debtors are measured at transaction price (which is usually the invoice price), less any impairment losses for bad and doubtful debts. Loans and other financial assets are initially recognised at transaction price including any transaction costs and subsequently measured at amortised cost determined using the effective interest method, less any impairment losses for bad and doubtful debts.

***Creditors***

Short term creditors are measured at transaction price (which is usually the invoice price). Loans and other financial liabilities are initially recognised at transaction price net of any transaction costs and subsequently measured at amortised cost determined using the effective interest method.

***Taxation***

A current tax liability is recognised for the tax payable on the taxable profit of the current and past periods. A current tax asset is recognised in respect of a tax loss that can be carried back to recover tax paid in a previous period. Deferred tax is recognised in respect of all timing differences between the recognition of income and expenses in the financial statements and their inclusion in tax assessments. Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used. Current and deferred tax assets and liabilities are not discounted.

***Provisions***

Provisions (ie liabilities of uncertain timing or amount) are recognised when there is an obligation at the reporting date as a result of a past event, it is probable that economic benefit will be transferred to settle the obligation and the amount of the obligation can be estimated reliably.

### **Foreign currency translation**

Transactions in foreign currencies are initially recognised at the rate of exchange ruling at the date of the transaction. At the end of each reporting period foreign currency monetary items are translated at the closing rate of exchange. Non-monetary items that are measured at historical cost are translated at the rate ruling at the date of the transaction. All differences are charged to profit or loss.

### **Pensions**

Contributions to defined contribution plans are expensed in the period to which they relate.

International Governance and Risk Limited is a private company limited by shares and incorporated in England. Its registered office is:

Suite 36  
88-90 Hatton Garden  
London  
United Kingdom  
EC1N 8PN

This document was delivered using electronic communications and authenticated in accordance with the registrar's rules relating to electronic form, authentication and manner of delivery under section 1072 of the Companies Act 2006.

## Complaints Policy

**Latest Revision Date: 19<sup>th</sup> June 2025**

### Applicability

This policy applies to all personnel (including permanent and short or fixed-term staff, volunteers and interns, and short and long-term expert consultants), GovRisk's partner organisations and contractors, and GovRisk's directors.

### Objectives and rationale

The International Governance and Risk Institute believes that a person wishing to make a complaint about the organisation should be able to do so easily and without undue hindrance.

Complaints to the organisation may reflect underlying problems with the way we operate and as such are a vital opportunity for us to reflect on this input and adapt accordingly.

### Timescale and organisation

If anyone has a grievance they should approach a director or appropriate person to bring the matter to their attention. The Managing Director will also be informed, as they will guide the investigation. Formal complaints should be made by email: [victoria.harvey@govrisk.org](mailto:victoria.harvey@govrisk.org). If the report is concerning the Managing Director, complaints can be reported to (and the investigations will be undertaken by) the company directors ([nicolas.lemoignan@govrisk.org](mailto:nicolas.lemoignan@govrisk.org); [dominic.lemoignan@govrisk.org](mailto:dominic.lemoignan@govrisk.org)).

The issue will be documented and investigated by the employer within 48 hours. All correspondence will then be answered within five working days, if not sooner, by email if possible or, failing that, in writing. Oral complaints will be transcribed to email. A summary of the initial complaint will be sent along with the response by email and a conclusion reached within a reasonable timeframe.

### Dealing with complaints

Each complaint is to be investigated fully to determine the appropriate action and deliver an appropriate response that is prompt and polite. The subject of the complaint (whether a trainer, course, policy, materials etc.) is to be investigated so that a response can be offered. This may include information, explanation, apology or compensation where appropriate. The complaint will then be kept on file and used in periodic performance reviews to identify any underlying problems that need to be addressed. Dialogue between the complainant and the organisation should aim to be open, honest and deal with matters confidentially. All complaints are to be treated in the same, fair manner, no matter what the severity.

## Whistleblowing Procedure

**Date Revised: 19<sup>th</sup> June 2025**

### Applicability

This policy applies to all personnel (including permanent and short or fixed-term staff, volunteers and interns, and short and long-term expert consultants), GovRisk's partner organisations and contractors, and GovRisk's directors.

### Objectives and rationale

GovRisk actively encourages the reporting of any activities which are perceived to be in breach of any of the policies contained within the GovRisk Code of Conduct or do not align with fair and ethical business practice.

Any employee bringing information about a perceived wrongdoing to GovRisk or another relevant organisation will be afforded protection under the Public Interest Disclosure Act 1998.

Victimising another for, or deterring another from, using this procedure will be construed as gross misconduct and may result in termination of employment.

### Definition of a whistleblowing

Whistleblowing is the disclosure of information which relates to suspected wrongdoing (generally a breach of a legal, statutory or regulatory requirement or unethical, immoral behaviour). This may include:

- A criminal offence (e.g. fraud)
- Breach of a legal requirement: health and safety obligations;
- Risk or actual damage to the environment;
- Covering up of a wrongdoing.

### Disclosure

All genuine beliefs that GovRisk, or a GovRisk employee, has taken, will take or is failing to prevent an action that could be perceived as wrongdoing, can be disclosed verbally or in writing to company directors. All disclosures should include the full details of the believed wrongdoing along with, where possible, supporting evidence. The Company Directors can be contacted at: [dominic.lemoignan@govrisk.org](mailto:dominic.lemoignan@govrisk.org) or [nicolas.lemoignan@govrisk.org](mailto:nicolas.lemoignan@govrisk.org).

If your disclosure contains allegations which you do not wish to make to the Company Directors, you can make the disclosure to the Non-Executive Director. Formal disclosure should be made by email at: [marc.buchner@govrisk.org](mailto:marc.buchner@govrisk.org).

### Investigation

Disclosures will be investigated promptly after the receipt of information. Individuals making disclosures will be kept anonymous where possible, and informed of progress during the investigation.

## Outcome

Following conclusion of the investigation all parties will be informed of the outcome. If enough evidence exists to support the allegation, the appropriate client will be notified. Separately, allegations of fraud or other criminal activity may also be directly reported to the UK Foreign, Commonwealth & Development Office (FCDO), U.S. Department of State – Office of Inspector General, Inter-American Development Bank (IDB), and Gesellschaft für Internationale Zusammenarbeit (GIZ).

UK FCDO can be contacted at: [reportingconcerns@fcdo.gov.uk](mailto:reportingconcerns@fcdo.gov.uk), +44 (0)1355 843747  
Inter-American Development Bank (IDB) can be contacted at: [OII-reportfraud@iadb.org](mailto:OII-reportfraud@iadb.org), 1-877-223-4551  
U.S. Department of State – Office of Inspector General can be contacted at: 1-800-409-9926  
GIZ can be contacted at: [compliance-mailbox@giz.de](mailto:compliance-mailbox@giz.de), +49 6196 79 3325.

## Training

All employees and consultants will receive an appropriate briefing to ensure that they are fully aware of their rights and responsibilities under this policy.

# Code of Conduct

June 2025

**Latest Revision Date: 19<sup>th</sup> June 2025**

## Introduction

GovRisk operates in over 30 countries around the globe, endeavouring to reduce corruption and improve integrity and transparency through the delivery of its training and consultancy services. Therefore, to ensure our mandate in combating corruption, GovRisk is committed to conducting business in accordance with all relevant laws and regulations, and to upholding the highest standards of ethical behaviour and integrity.

In this Code of Conduct document, GovRisk sets out its commitments to fair and ethical business practice. If the Code of Conduct is breached, or suspected to have been breached, GovRisk will proceed transparently and openly, promptly notifying the relevant authorities.

## Applicability

This policy applies to all personnel (including permanent and short or fixed-term staff, volunteers, interns, and short and long-term expert consultants), GovRisk's partner organisations and contractors, and GovRisk's directors.

Everyone who works with GovRisk is responsible for maintaining GovRisk's core values and operating to a high ethical standard, and agrees to respect the Code of Conduct at all times. It is each employee/consultant's duty to report if the Code of Conduct is not being upheld, whether through your own manager or colleagues, or by using the GovRisk Whistleblowing policy. GovRisk takes any breaches to the Code of Conduct extremely seriously, and may result in disciplinary procedures.

## UN Global Compact

GovRisk commits to comply with the Ten Principles of the UN Global Compact as detailed below and described throughout this Code of Conduct.

## Human Rights

- Principle 1: Businesses should support and respect the protection of internationally proclaimed human rights; and
- Principle 2: Business should ensure they are not complicit in human rights abuses

## Labour

- Principle 3: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
- Principle 4: Businesses should uphold the elimination of all forms of forced and compulsory labour;
- Principle 5: Businesses should uphold the effective abolition of child labour;
- Principle 6: Businesses should uphold the elimination of discrimination in respect of employment and occupation.

## Environment:

- Principle 7: Businesses should support a precautionary approach to environmental challenges;
- Principle 8: Businesses should undertake initiatives to promote greater environmental responsibility;
- Principle 9: Businesses should encourage the development and diffusion of environmentally friendly technologies.

#### **Anti-Corruption:**

- Principle 10: Businesses should work against corruption in all its forms, including extortion and bribery.
- 

GovRisk Code of Conduct is divided into six sections: Human Rights, Labour, Environment, Anti-corruption, Due diligence and Data Protection.

## Section 1: Human Rights

### Human Trafficking and Modern Slavery

Modern slavery is a term used to encompass slavery, servitude, forced and compulsory labour, bonded and child labour and human trafficking. Human trafficking is where a person arranges or facilitates the travel of another person with a view to that person being exploited. Modern slavery is a crime and a violation of fundamental human rights. GovRisk has a zero-tolerance approach to any form of modern slavery, which is based on S.54 of the Modern Slavery Act 2015. GovRisk strictly prohibits the use of modern slavery and human trafficking in our operations and supply chain. We are committed to acting ethically and with integrity and transparency in all business dealings and to putting effective systems and controls in place to safeguard against any form of modern slavery taking place within the business or our supply chain. We expect that our suppliers will hold their own suppliers to the same high standards.

See **GovRisk's Modern Slavery Statement** for further information.

## Section 2: Labour

GovRisk is an equal opportunities employer. Through our Diversity and Inclusion policy, we make it clear to our staff that discrimination is not acceptable. Through our supply chain management on projects, we actively manage the risks related to forced or child labour and modern slavery.

### Equal Opportunities

GovRisk follows an inclusive and socially responsible employment policy in line with the Equality Act 2010 and is fully committed to providing equal opportunity to all persons. The policy ensures that no job applicant or employee is discriminated against either directly or indirectly on the grounds of age, disability, gender reassignment, marriage and civil partnership, race, religion or sexual orientation.

See the **Diversity and Inclusion Policy**.

## Counter Terrorism

As an international organisation, GovRisk is conscious of the current threat of terrorism on both a national and global basis. GovRisk maintains a zero-tolerance policy on the incitement of terror and proliferation of terrorist material in line with the Terrorism Act 2006.

When aware of such activities GovRisk will inform the relevant authorities. This policy extends to all of the company's activities in the countries within which it and its associates operate.

See the **GovRisk Counter Terrorism Policy** for further information.

## Safeguarding

GovRisk has a safeguarding commitment to prevent and reduce harm to children and vulnerable adults who may be in contact with our staff and consultants.

These principles are based on the International Bill of Human Rights and the core International Labour Organisations (ILO) Conventions. At GovRisk we hold our corporate responsibility to respect human rights and have incorporated this into our own internal employee handbook through our Diversity and Inclusion Policy and within our wider recruitment policy. Human rights are also referred to in our Modern Slavery and Anti-trafficking policy. Through our due diligence work and transparency across the supply chains we actively manage the risk of being complicit in other companies abuse of human rights.

See **GovRisk Safeguarding Policy** and the **GovRisk Modern Slavery Statement** for further information.

## Health and Safety

It is the aim of GovRisk to prevent accidents and cases of work-related ill health, as well as to provide adequate control of health and safety risks arising from work activities. GovRisk will achieve this by undertaking relevant risk assessments and ensuring action required to remove/control potential risks.

We have a moral and legal duty of care for the health, safety and welfare of our employees and the families and others associated with staff who are in our locations where we work around the world. In all of our working environments, we are committed to ensuring that staff are in healthy, safe conditions.

See the **Health and Safety Policy** for further information.

## Section 3: Environment

### Environment

GovRisk is committed to minimising our environmental footprint by preventing pollution and encouraging practices to promote sustainability.

See **Environmental Policy** for further information.

## Section 4: Anti-corruption

### Fraud, Bribery and Corruption

GovRisk condemns in the strongest possible terms all forms of fraud, bribery and corruption and operates a zero-tolerance policy to both. GovRisk will pursue company sanctions as well as legal charges if such instances are detected.

- Fraud is wrongful or criminal deception intended to result in financial or personal gain;
- Bribery is the offering, promising, giving, receiving or soliciting anything of value to influence the actions of another party<sup>1</sup>;
- Corruption is the abuse of entrusted power for private gain.

We are committed to fair and professional business conduct and the implementation of systems that ensure fraud, bribery and corruption are detected and prevented. GovRisk is committed to acting professionally, fairly and with integrity in all relationships and business dealings in all countries and to implementing and enforcing effective systems to counter fraud, bribery and corruption. GovRisk expects its employees and consultants to comply with our fraud, anti-bribery and corruption policy and uphold all laws relevant to countering bribery and corruption. We are bound by the laws of the UK, including the UK Bribery Act 2010, in regard to our business operations both domestically and overseas.

All employees and consultants are encouraged to report any instances of fraud, bribery and corruption in line with GovRisk's Whistleblowing Policy.

See **Anti-Bribery and Corruption Policy** and **Whistleblowing Policy** for further details.

### Whistle-blower Procedure

GovRisk actively encourages the reporting of any activities which are perceived to be in breach of any of the policies contained within this document or do not align with fair and ethical business practice.

Any employee bringing information about a perceived wrongdoing to GovRisk or another relevant organisation will be afforded protection under the Public Interest Disclosure Act 1998.

Victimising another for, or deterring another from, using this procedure will be construed as gross misconduct and may result in termination of employment.

See the **GovRisk Whistleblowing Policy** for further information.

### Conflict of Interest

GovRisk recognises that the sensitive nature of its work calls for the early identification and management of Conflicts of Interest, or perceptions thereof. Conflicts of interests may arise where an individual's personal or family interests and/or loyalties conflict with those of GovRisk. Therefore, all GovRisk employees, including sub-contractors, must declare in writing to their manager any and all conflicts of interest.

---

<sup>1</sup> Black's Law Dictionary

In addition to this GovRisk requires all those who conduct work on the companies behalf to declare if they or those with whom they have a personal relationship are “Politically Exposed Persons” (PEP)<sup>2</sup>.

See **Conflict of Interest Policy** for further information.

## Section 5: Due Diligence

### Due Diligence

Due Diligence refers to the duty of care a person or entity should take, evaluating associated risks in all transactions, before entering into an agreement or a financial transaction with another party.

GovRisk conducts due diligence of each potential staff member and associate consultant, and also adopts a proportionate approach to due diligence based on the complexity and scale of each intervention. GovRisk project managers are required to undertake partner specific risk and value assessments and agree the scope of the assessment with GovRisk directors to make an informed decision on entering an agreement with a potential partner.

See the **Due Diligence Policy** and the **Internal and External Recruitment Policy** for further information.

### Supplier Management

GovRisk chooses our partners and suppliers through competitive selection processes, and conduct thorough background checks and due diligence. We work respectfully and honestly with them. We adapt procurement policies and procedures to local context, laws and regulations.

See **Due Diligence Questionnaire** for further information.

## Section 6: Data Protection

### Data Protection

GovRisk is committed to privacy, the responsible use of information, the need to safeguard the privacy of our clients and visitors to our website and to maintaining compliance with privacy legislation.

If you apply for a job at GovRisk, you may be asked to provide details about yourself which typically includes your contact information and resume (CV). This information is only used for employment consideration.

None of the personal information we collect will be shared with any third parties and is used solely for internal purposes.

---

<sup>2</sup> A Politically Exposed Person (PEP) is someone who holds or has held a senior position in any state, national body or international body including government, civil service, judiciary, armed forces or public organisation such as the UN or World Bank or is a family member of a known close associate of a PEP.

GovRisk is subject to strict data rules to protect privacy including the General Data Protection Regulation (GDPR) that all companies collecting data in the European Union must comply with<sup>3</sup>.

See **General Data Protection Regulation (GDPR) Policy** and the **GovRisk Online Presence Policy** for reference.

---

<sup>3</sup> This is subject to being amended once the UK's transition period from the UK is completed.
